

REMARKS

A notice of missing parts has been received. Applicant is submitting 17 proposed replacement sheets of new drawings and an amendment with one canceled claim, one amended claim and eighteen new claims of which 2 are independent. The new drawings were all derived from portions of the Figures 11 and 12. A reset switch is shown on Figure 9 but was not shown on the original Fig. 11; however, the reset switch and function were described at page 7, line 23 of the application as filed. The description of the circuit is expanded based on the replacement drawings. The description and operation of the circuit is inherent in the schematics as originally submitted. The operation of the IDLE circuit is mentioned at page 11, lines 28 and subsequent in the case as filed. The explanation of the related circuit is expanded in this amendment; however, since the entire idle circuit appeared in the original Figure 11 as filed, the and in other portions of the figures as filed, the expanded explanation is NOT believed to be new matter because the operation of the idle circuit is inherent in the drawings as originally submitted. A clean substitute **ABSTRACT** is submitted herewith. The marked up version appears above in this first amendment.

The Commissioner is hereby authorized to charge any additional fees which may be required regarding this application under 37 C.F.R. §§ 1.16 -1.17, or credit any overpayment, to Deposit Account No. 500656. Should the payment enclosed herewith, by a check be in the wrong amount, unsigned, post-dated, otherwise improper or informal or even entirely missing, the Commissioner is authorized to charge the unpaid amount to Deposit Account No. 500656. If any extensions of time are needed for timely acceptance of papers submitted herewith, applicant hereby petitions for such extension under 37 C.F.R. §1.136 and authorizes payment of any such extensions fees to Deposit Account No. 500656.

Respectfully Submitted,

James F. Kirk
